## **Amendments to the Claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

1. - 33. (Cancelled)

- 34. (Currently Amended) A pharmaceutical compositions, wherein said pharmaceutical composition comprises ginseng fraction CVT-E002 and a pharmaceutically acceptable carrier.
- 35. (Currently Amended) A method of preparing a pharmaceutical composition suitable for treating a condition characterized by low immunity, wherein said method comprises adding a low immunity condition combining an effective treating amount of ginseng fraction CVT-E002 and, optionally, an effective amount of another medicament that is suitable for treating a condition characterized by low immunity in a low immunity condition effective treating amount with at least one pharmaceutically acceptable excipient to produce a pharmaceutical composition suitable for treating a condition characterized by low immunity.
- 36. (Previously Presented) The method of claim 35, wherein the condition is selected from the group consisting of common cold, influenza, chronic fatigue syndrome, AIDS and cancer.
- 37. (Currently Amended) A method of stimulating the production of IL-1, IL-16 and/or TNF-α in cells, wherein said method comprises administering a production stimulating contacting said cells with an effective amount of ginseng fraction CVT-E002 to said cells.

## 38. (Cancelled)

Appln. No. 10/690,628 Amendment dated June 9, 2006 Reply to Office Action of March 13, 2006

- 39. (Currently Amended) A method of activating B-lymphocyte proliferation <u>and</u> antibody production resulting from said B-lymphocyte proliferation in a patient in need of <u>such proliferation</u>, and the resulting antibody production wherein said method comprises administering a B-lymphocyte proliferating to the patient an effective amount of ginseng fraction CVT-E002.
- 40. (Currently Amended) A method of treating a condition characterized by low immunity in a patient in need thereof, comprising administering to be the patient a condition treating an effective amount of ginseng fraction CVT-E002.
- 41. (Original) The method of claim 40, wherein the condition is selected from the group consisting of common cold, influenza, chronic fatigue syndrome, AIDS and cancer.
- 42. (New) A method of stimulating the *in vitro* production of immunoglobulins in cells, wherein said method comprises contacting cells with an effective amount of ginseng fraction CVT-E002.
- 43. (New) A method of stimulating the *in vivo* production of immunoglobulins in a subject in need thereof, wherein said method comprises administering to the subject an effective amount of ginseng fraction CVT-E002.
